-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Line 3, the limitation "the mounting points" lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 12, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Morgan et al U.S. Patent 5,935,011.

Morgan et al disclosed an apparatus comprising a body (10) adapted to accommodate a wheelchair (124), Fig. 5 shows the body including a seat assembly comprising at least a pair of seat members (132, 134) moveable between a first position whereby the seat members are engaged with each other to form a seat for a user, and a second position whereby the seat assembly is collapsed to accommodate a wheelchair; a ramp (31) so as to permit access to the body by a person confined in a wheelchair, the ramp comprising a first ramp member (32) for securing to the ground, the first ramp member being pivotably connected to a second ramp member (33) adapted to releasably engage with the body as shown in Fig. 2 (applicant's claim 1). The body (10) inherently includes vertically extending frame members such as sidewalls

Art Unit: 3714

so as to confine the participant (applicant's claim 12), and a transverse extending frame members (floor) which pass underneath the body and connect vertically extending frame members located on each side of the body (applicant's claim 15).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morgan et al.

It is noted that Morgan et al failed to specifically teach the body is unitary construction and formed from molded plastic for the purpose of reducing the weight of the body. However, such features are very well known in the art and it would have been a matter of design choice to manufacture the body of the apparatus of Morgan et al with a unitary construction and formed from molded plastic for the reason as set forth above.

Allowable Subject Matter

Claims 2-9, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
